

# 7 **HTML** Snippets

Every Developers Must Know

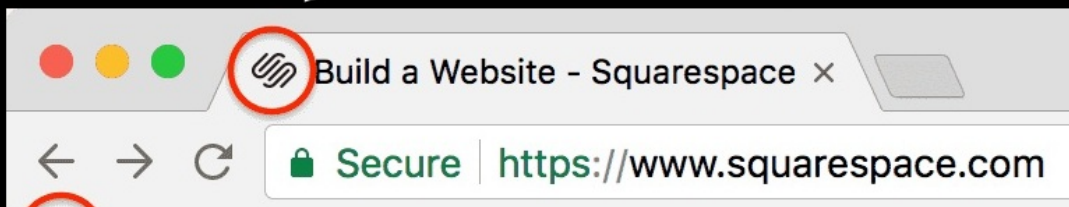

Swipe>>

# Favicon

Don't get stuck using the default favicon. Customise it for a bit of branding in the tab & bookmarks.

```
<link rel="icon" href="icon.png" type="image/png">
```

# Viewport

Allow your page to scale with the device width  
because every site should be responsive!

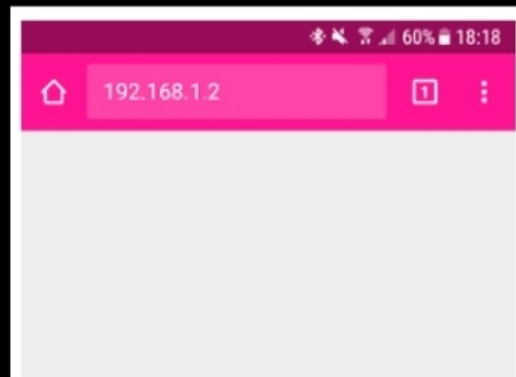

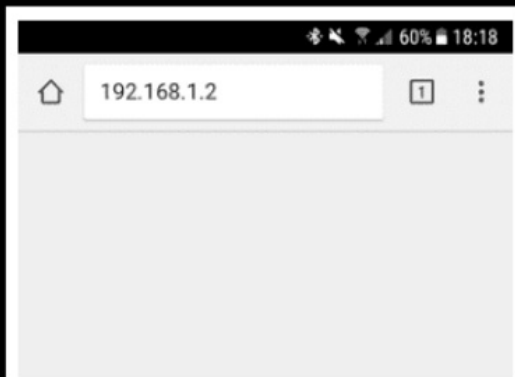

```
<link rel="icon" href="icon.png"  
type="image/png">
```

# Theme-Color

Extend your branding to the browser header on mobile devices.

```
<meta name="theme-color" content="#1bb566">
```

# Call & SMS Links

These links will trigger a call or start an SMS message if the device supports it.

```
<a href="tel:+919876543210">Call Now</a>
```

```
<a href="tel:+919876543210">Send Message</a>
```

# HTML Redirect

Handle a page redirect via HTML. Change the "3" to "0" for an instant redirect.

```
<meta http-equiv="refresh" content="3;  
url = https://uvaiscodes.blogspot.com/" />
```

# Aysec Load JS

Load your JavaScript file asynchronously so the browser will load the HTML and JS files at the same time.

```
<script src="demo.js" async></script>
```

# Noopener & noreferrer

Prevent an external page gaining access to the original page and don't pass referrer information.

```
<a href="https://uvaiscodes.blogspot.com/"  
target="_blank" rel="noopener noreferrer">
```
